About Us

Our Story

Chances Advocates derived from our journey as parents to our Autistic son. Our son has changed our lives in so many positive ways. Our son was diagnosed at the age of 2 years old and was non-verbal until the age of 5. After receiving the diagnosis of Autism in 2018, as a family, we felt lost, sad, confused, and had limited places to turn to. During this time, my husband and I struggled with the denial and acceptance stages.

As a result, we designed this program to assist families with Advocacy services with the focus on the physical and mental well being of the parent/ caregiver. Our goal is to decrease the feeling of stress, depression, and isolation while families navigate and embark on this journey.

Our Services

Case Management

Our goal is to relieve stress from families when they receive the initial diagnosis of Autism. Chances Advocates will help families turn their fears and uncertainty into action. Our advocates will meet with families to find out their child's individual needs in order to develop a success plan. This plan will consist of implementing appropriate services for your child in addition to personal case management assistance along the way. Chances will be here from the beginning to the end in this process.

Advocates can

- Attend IEP/ 504 meetings with parents.
- Collaborate with Pediatricians, Neurologists, Dentist etc.
- Refer to local agencies for ABA/ Speech/ PT/ OT services.
- Assist parents with coordination for care with insurance companies.

Parent Education/Workshops

Chances Advocates will provide educational workshops that aim to educate parents and the community. For many parents, it can be overwhelming learning about your child's condition and finding the right solutions/ interventions. Our workshops will equip parents/ caregivers with the right tools to advocate for their child's success.

" There needs to be a lot of Emphasis on what a child can do instead of what they cannot do "

-Temple Grandlin

Individual Counseling

Area of Focus

- Depression
- Anxiety
- Acceptance of Autism diagnosis
